

**Companion Animal Protection Society (CAPS)
Investigation of Barkworks' Breeders, December 2010**
(All photos from hidden video camera footage)

**Breeder: Amos Slabaugh, Prairie Home, MO
USDA license #43-A-3971**

Dogs live in cramped cages on their own waste, which contaminates food and water.

Several dead animals in different stages of decomposition were on the property. Shown here, a baby goat that froze to death overnight; it was seen alive the day before.

**Breeder: Barb Crick, Cricks Kennels; Burwell, NE
USDA license #47-A-0426**

Matted Cocker Spaniel in outdoor cage; hair accumulation on bowl.

Plastic dog houses are the only shelter from the 18-degree (F) temperature.
